Generators Three.Js

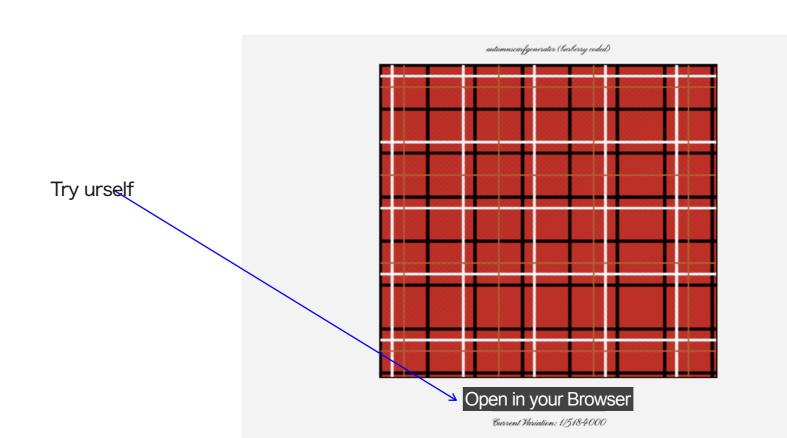

Randomly generated logos based on letterforms using different line styles, spacing and size. The generator builds the letters 'M' and 'G' (or 'mg') out of a wide range of web fonts and google fonts.

Creative Coding

Generators Three.Js

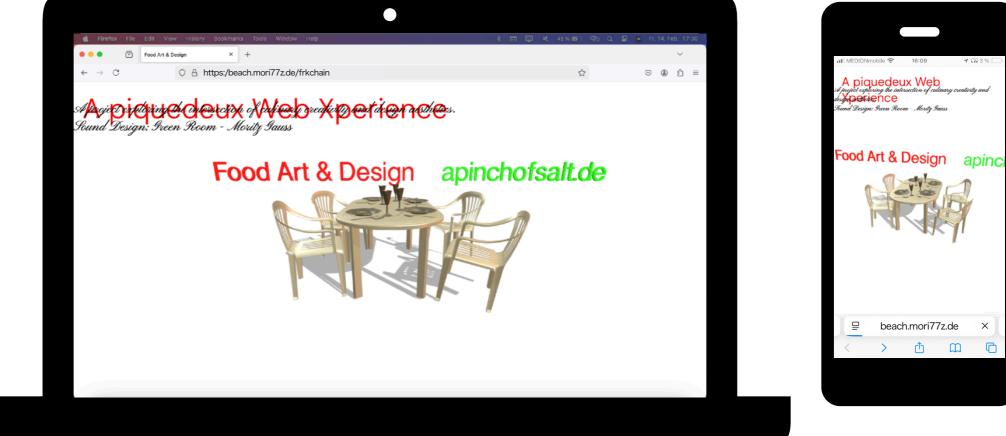

This project is a custom pattern generator that creates unique, randomly generated patterns using harmonious colors, stripes, and diagonal hatching. The patterns are drawn on an HTML5 canvas and offer a variety of variations with each click of the "Generate New Pattern" button.

Generators Three.Js

Three.js 3d web rendering

The 3.js Javascript Library enables online Renderings of .glb files made in Blender, for example. With orbit controls in the webpage and full support of pbr textures and lights.

Clickable 3D Link

Text Effect on Click

Sound starts playing on Click

Generated Images Prints

Made with the help of Midjourney.

Generated Images Prints

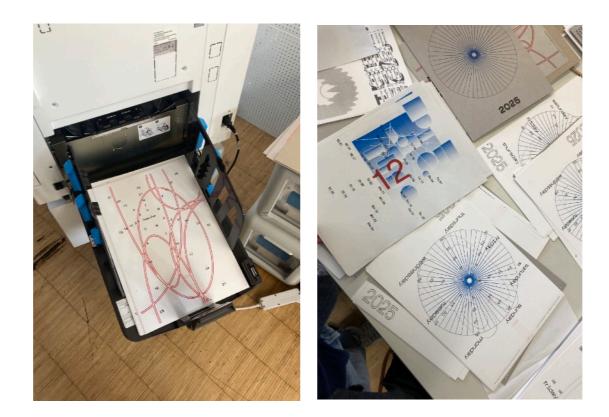

Composed images with Deep Ai.

Generated Images Prints

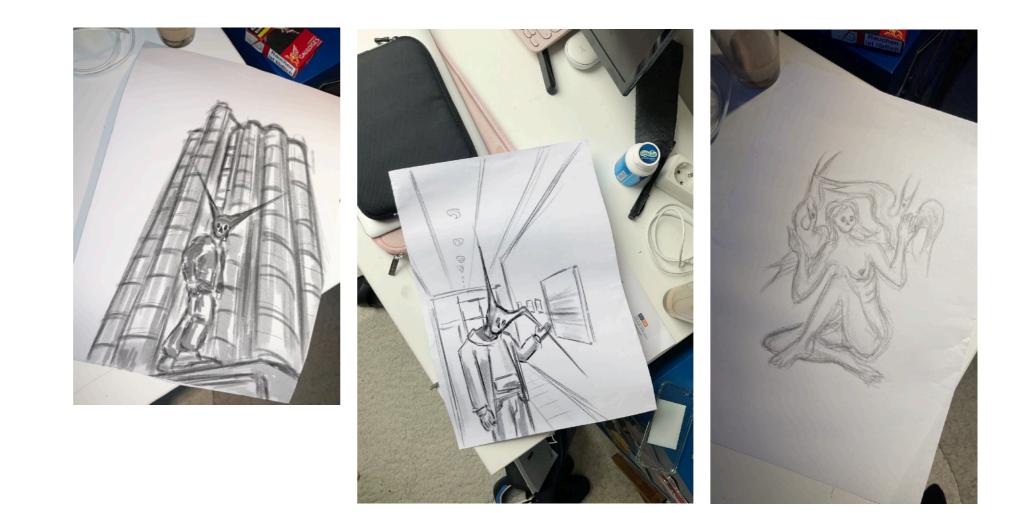

Digitally drawn calendar web version and print

Calendar Design made in p5.js and web version developed in Code Editor, printed with Riso.

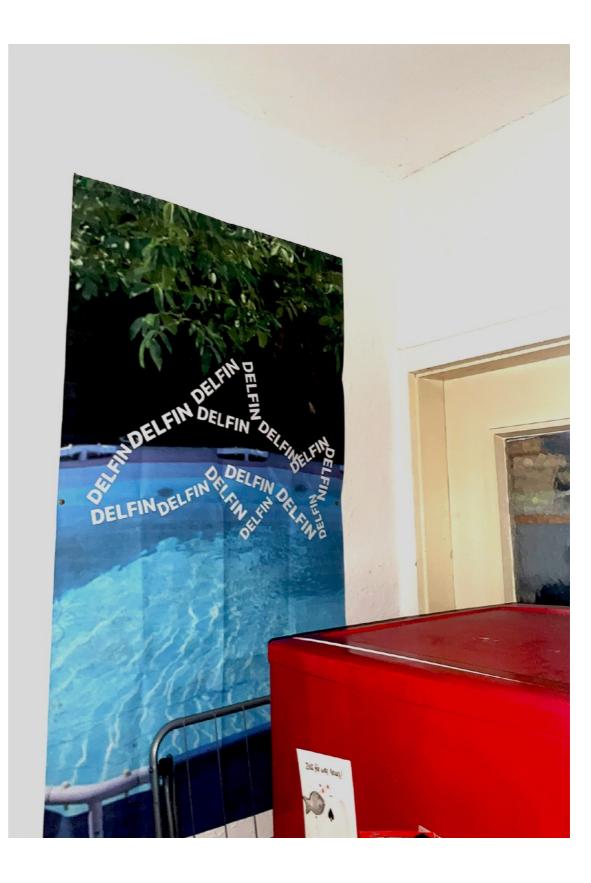

Generated Images Prints

iSketched on iPad but made it look like pencil on paper (photoshop)
